10. Gift Box

How to make them

1. Print page 1 on white cardstock at 100% (no scaling) for 2.2 in tags, or use the SVG zip.
2. Cricut: upload each SVG, then Flatten for Print Then Cut, or cut the plain shape from glitter or kraft card.
3. Silhouette / LightBurn: import the SVG; every file is one closed compound path with the hole already cut.
4. Punch or cut the hanging hole, thread with baker's twine or velvet ribbon and add a sprig of rosemary.
5. Write names in white gel pen on the coloured tags, or let kids colour page 2 for grandparents' gifts.
