SNOWFLAKE CRAFT HOW-TO

SVG cut files + print-then-cut

For Cricut Design Space & Silhouette Studio

1. Print or cut

Print pages 1–2 on cardstock and cut on the dashed lines, or upload the SVG zip and cut from card or vellum.

2. Layer setup

In your machine software set the outer snowflake path to Cut. Optional score lines can be dashed cut.

3. Size freely

Designs are in millimetres. Resize to 60–100 mm for tree ornaments or 120 mm for window hangers.

4. Finish

Punch or use the hanging hole, thread ribbon or twine, and hang on the tree, a gift or a window.

5. Materials

80–160 gsm card, kraft, vellum or glitter card. Avoid very thick chipboard for intricate arms.

6. Licence

Free for personal and classroom use. Please do not resell the digital files.
