05 Notched luggage tag

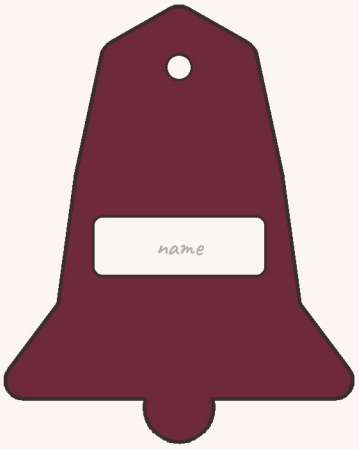

06 Star

07 Christmas tree

08 Bell

MANTEL BANNER

Merry Christmas Pennants

print on cardstock • cut • punch the two holes • thread on twine

Stocking Stuffers

SANTA'S DROP-OFF STATION

CRICUT • SILHOUETTE • SCISSORS

How to Cut Your Tags & Banner

three easy ways to make them

1 Scissors & hole punch

- Print pages 1–2 at 100% (Actual size) on 200–250 gsm cardstock.
- Cut around each tag and pennant, leaving a thin white edge if you like.
- Punch the hole, write names on the cream bands and add twine.

2 Cricut Print Then Cut

- Unzip the SVG pack and upload a stocking-tag-XX.svg file to Design Space.
- Keep print-colour as Print Then Cut; set cut-outline and cut-hole to Cut.
- Max print size is about 6.75 × 9.25 in — tags fit easily, several per sheet.

3 Silhouette / plain cut

- Open the SVG in Silhouette Studio (Designer Edition or higher for SVG).
- Hide the colour layer and cut tags from coloured card, kraft or felt.
- Use the draw-letters layer on the banner with a sketch pen, or Print & Cut.
