Snowy Cottage

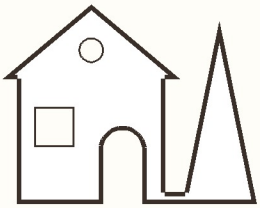

Little Chapel

Townhouse

Toy Shop

Pine Cabin

## How to make them glow

1. Cut each house from 65–110 lb cardstock, or kraft board for a rustic look (about 4–5 in tall).
2. Glue vellum or tracing paper behind the windows and door — it diffuses light like frosted glass.
3. Score a 1 in strip of card, fold it into a triangle and glue it behind the house as a stand.
4. Line the houses up on a mantel or shelf with faux snow and bottle-brush trees.
5. Place a battery LED tea light behind each house (never a real flame).
