PRINT-THEN-CUT AT 100% SCALE • HOUSE BODY • MATCHING SVG CUT FILES IN THE ZIP

Gingerbread House Gift Box

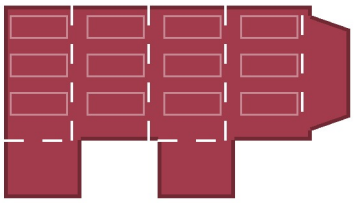

Cut on the solid outline; fold on every dashed line (score first for crisp edges).

1. Print on 65–110 lb cardstock at Actual Size / 100% (Letter) — or fit to page on A4.
2. Cut out the body net and the window holes. Back the windows with vellum or yellow tissue for a glowing effect.
3. Fold the four walls into a box and glue the long side tab behind the back wall.
4. Fold up the base, tuck the flap, then fill with treats, cookies or a gift card.
5. Glue the scalloped roof (page 2) onto the little roof tabs, slot in the chimney and tie on the gingerbread tag.

scalloped roof — fold in half

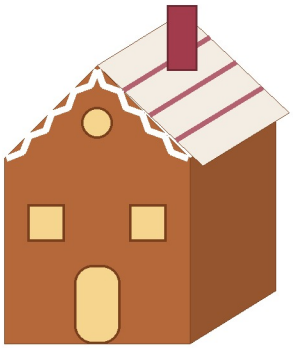

chimney — fold into a square tube

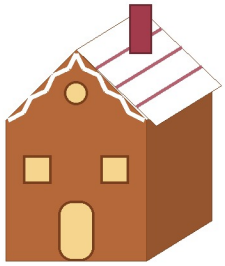

4 gingerbread man gift tags

Tips & treat ideas

- Finished size about 2 × 1.5 × 3 inches — perfect for truffles, fudge, a gift card or jewellery.
- Cricut / Silhouette: upload the SVGs, set the 'score' layer to Score (or Draw) and the 'cut' layer to Cut.
- Want a bigger box? Scale every SVG by the same amount (150% makes a 3-inch-wide house).
- Decorate the plain cut version with white paint pen 'icing', sequins or mini pom-poms.
- Make a row of houses for a Christmas village table runner or advent countdown (number the doors 1–24).
